- Software Engineering
- Object Oriented Programming
- Operating System
- System Analysis and Design
- Data Base Management System

PERSONAL SKILLS

- Communication • Adaptability
- Analytical Skills • Team Work
- Project Management

EXPERIENCE

CALOR STICHES | FRONTEND ENGINEER (VOLUNTEER) 🔗

[Website](#)

📅 June 2024 - Present

- The calor stiches project is an e-commerce clothing website where users can browse range of stiched clothing items.
- Users can add products to their cart and proceed to checkout, where multiple payment options are available.
- This platform aims to provide a seamless shopping experience, from product discovery to purchase completion.
- I am planning to integrate RESTful APIs to fetch real-time currency exchange rates.
- Tech Stack - HTML, CSS3, JavaScript, React.

PROJECTS

LIVESEG FOOTBALL 🔗 [Website](#) 🐙 [Github](#)

- The football streaming app is a platform designed to provide football fans with real-time live action and coverage of their favorite matches and tournaments.
- The app provides set of features to the users aimed at enhancing the fan experience.
- Tech Stack - HTML, BootStrap, JavaScript.

CRUSHINGHT 🔗 [Website](#) 🐙 [Github](#)

- Crushinght is a project developed during a hackathon, showcasing my skills in web development.
- The project focuses on delivering a seamless user experience with a clean interface and interactive features.
- It showcases my ability to quickly transform designs into real-world projects.
- Tech Stack - HTML, CSS3, JavaScript.

LINK APP 🔗 [Website](#) 🐙 [Github](#)

- Link app helps users manage their social platform links in a single location.
- It allows users to add links, visit the links, and share these links with others.
- Users can also update their personal details, such as their email, name, and profile picture.
- Tech Stack - HTML, Tailwind CSS, JavaScript, React.
