TECHNICAL SKILLS

FRONTEND DEVELOPMENT

• HTML • CSS • Bootstrap • Tailwind CSS

BACKEND DEVELOPMENT

• Supabase

PROGRAMMING LANGUAGES

• JavaScript • TypeScript • Java • C • PHP • Python

FRAMEWORKS

• ReactJs • NextJs

TOOLS AND SOFTWARE

• Git • Github • VS Code • Framer Motion • Jest • React Testing Library • Redux

COURSEWORK

• Data Structures And Algorithm (DSA)
• Software Engineering
• System Analysis and Design
• Object Oriented Programming (OOP)

PERSONAL SKILLS

• Analytical Problem-Solving
• Creative UI/UX Design
• Agile Development

EXPERIENCE

CALOR STICHES | FRONTEND ENGINEER (VOLUNTEER) 🔗

[Website](#)

📅 June 2024 - Present

- Led the development of an e-commerce website for stitched clothing, enabling customers to browse, explore, and purchase products with ease.
- Implemented a robust cart and checkout system with support for multiple payment options to improve end-users flexibility and ensuring transaction security.
- Optimized code splitting to achieve a 90+ performance score on Lighthouse, and implemented lazy loading reducing page load time by 2ms.
- Integrated RESTful APIs to provide real-time currency exchange rates, improving accessibility for international customers.
- Tech Stack - CSS, JavaScript, React.

PROJECTS

LIVESEG FOOTBALL APP 🔗 [Website](#) 🔗 [Github](#)

- Built a responsive web application that delivers real-time football match updates and live streams.
- Developed user-centric features like live scores, match highlights, improving fan engagement and retention.
- Constructed intuitive layout structure using Bootstrap, ensuring cross-browser compatibility and also produce a easy-to-use experience.
- Tech Stack - HTML, Bootstrap, JavaScript.

AKIN MUSIC 🔗 [Website](#) 🔗 [Github](#)

- Engineered an ad-free music streaming platform, providing app members with uninterrupted access to music and also delivering flawless listening experience.
- Implemented core features, including Play/Pause, Forward/Backward controls, and also optimized for performance and minimal latency.
- Enhanced platform functionality reducing bounce rate by 30%, with a clean, intuitive interface improving interaction.
- Tech Stack - CSS, JavaScript, React.

LINK APP 🔗 [Website](#) 🔗 [Github](#)

- Integrated Supabase to build a platform that organizes users' social and personal links, simplifying online identity sharing.
- Developed dynamic link previews and profile customization features using Supabase APIs with real-time capabilities.
- Implemented cross-browser authentication, including secure sign-up, login, and logout functionalities with uninterrupted interaction.
- Tech Stack - TailwindCSS, JavaScript, React, Supabase.
